FOLIO Update

Product progress, regional adoption, and the future of library innovation

Michelângelo Viana
Director, SaaS Innovation
Latin America and The Caribbean

A Library Platform That Evolves With Your Institution

Connected operations

Coordinate acquisitions, cataloging, circulation, acquisitions, and electronic resource management.

Flexible architecture

Choose Apps, and use open APIs to support integration with institutional systems and services

Data for decisions

Use operational data and reporting to inform management and planning to support decision making

Services that adapt

Evolve workflows and services as institutional needs change to improve efficiency and engagement

Better Patron Experience

Faster service, simpler access, greater satisfaction.

Stronger Partnerships

Connect staff teams, partner libraries, and vendors for a better collaboration.

FOLIO features modern applications for traditional and new needs

EBSCO folio

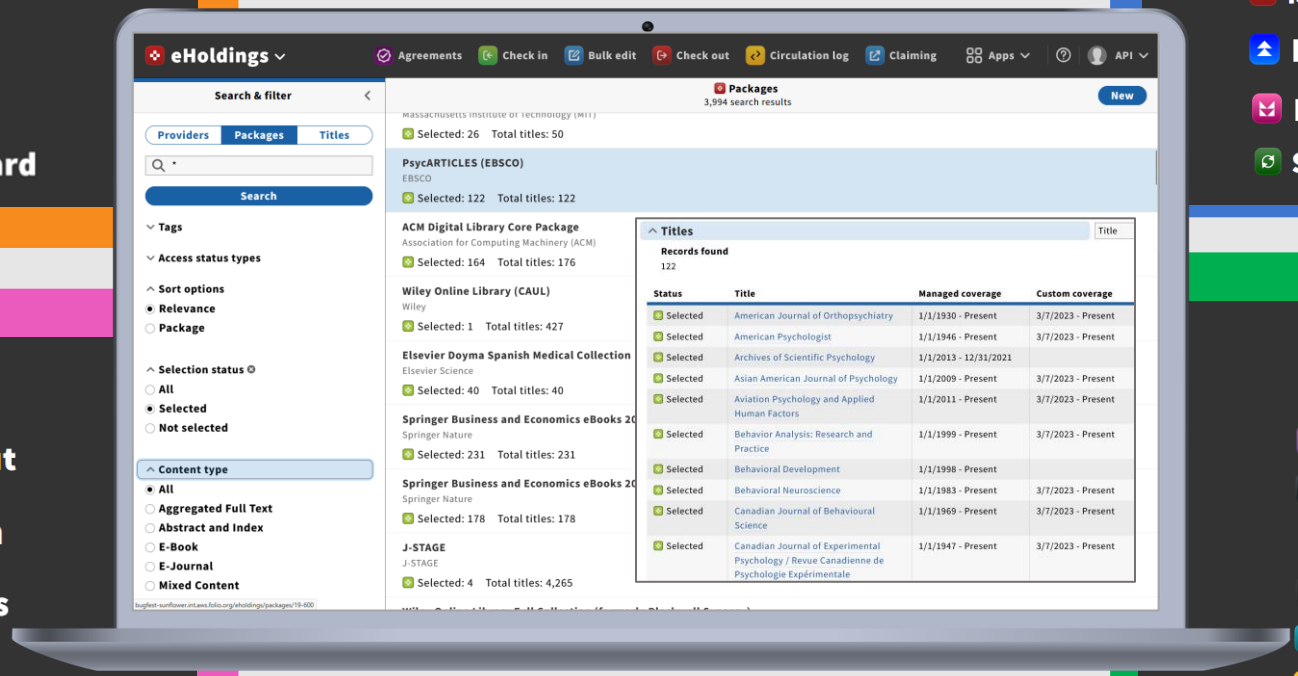

Library Services Platform

Management

- Settings
- Bulk edit
- Lists
- Tasks
- Dashboard

Cataloging

FOLIO Trillium Release

Expanding capabilities across core workflows

Improve operational efficiency

- Deeper EDI integration with MOSAIC for invoices and purchase orders.
- Faster ordering and receiving workflows.
- Bulk editing improvements for bibliographic records

Strengthen data and workflow control

- Improvements to import and export profiles and job management.
- Expanded lists and data management capabilities.
- More accessible custom fields in circulation workflows.

Expand bibliographic capabilities

- Linked-data functionality through the Marigold app.
- BIBFRAME editor and authority lookup improvements.
- Enhancements to MARC cataloging and classification browsing.

Global FOLIO community and adoption

300 Sites, One Vision: EBSCO FOLIO Unites the Global Library Community

EBSCO

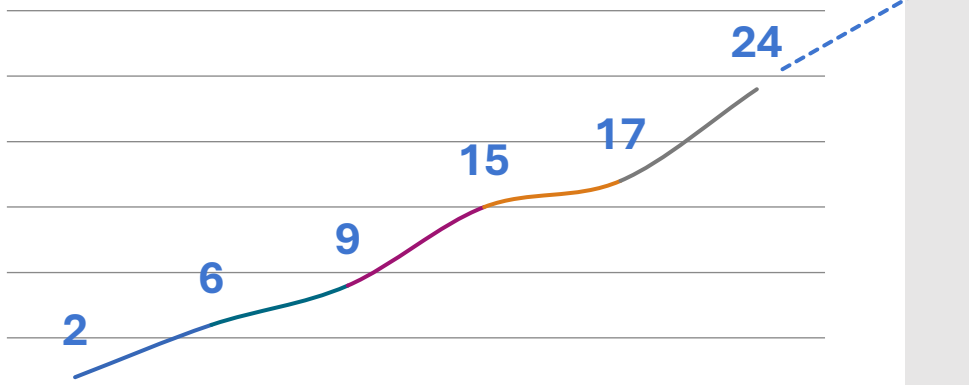

FOLIO Adoption in Latin America and the Caribbean Is Growing

24
adopters in 2026
2021 → 2026

50+
Sites
served

+7
new adopters in one year
2025 → 2026

	2021	2022	2023	2024	2025	2026
Cumulative Adopters	2	6	9	15	17	24

What this growth enables

- More institutions are participating in the regional FOLIO ecosystem.
- Adoption creates opportunities to exchange experience and share lessons.
- Regional collaboration can help institutions make more informed decisions about implementation and future development.

FOLIO is more than a modern library platform...

FOLIO is a
community-powered
path to innovation

Shared priorities, collaboration, and opportunities to contribute to development

EBSCO actively supports the **FOLIO LATAM Group**, fostering regional collaboration, in-person meetings, the exchange of best practices, and capacity building, thereby **strengthening the adoption and evolution of FOLIO in the region**.

Premium Services by Experts

How EBSCO supports the Transition from your ILS to FOLIO

	Stage	What EBSCO does	Outcome
1	**Plan and align**	Establish scope, assess existing workflows, identify dependencies, and agree on responsibilities and success criteria	Structured Plan
2	**Configure and migrate**	Configure the cloud environment, integrate institutional systems, migrate data, and validate results with the library.	Your data is migrated
3	**Prepare staff and services**	Deliver training, test workflows, validate migrated records, and confirm operational readiness.	Systems and staff are prepared
4	**Transition and stabilize**	Execute the agreed go-live plan, monitor operations, resolve issues, and confirm service continuity.	System is ready to use
5	**Support the ongoing evolution**	Provide the agreed support and maintenance services while planning for future releases and institutional needs.	New versions, 24x7 Support and consultancy for future needs

A Team of Experts for a seamless transition and continuous optimization

"The [FOLIO] implementation was a challenge because we had been using the same system — an extremely rigid one — for over 25 years; this has given us the opportunity to make a paradigm shift and bring about change for our library staff and our users."

"The decision to choose FOLIO was based on the fact that we were looking for a modern system that would allow us to collaborate on its development and facilitate user access to our bibliographic resources."

Dra. Nancy Abreu
Directora de Bibliotecas de la UPR
Recinto de Río Piedras

Evaluating FOLIO for Your Institution

🎯 Strategic fit

- Which institutional and library priorities should a new library services platform address?
- Where could more flexible workflows and integrated services create value?

⚙️ Operational readiness

- Which current workflows, systems, and integrations need to be maintained or improved?
- What data migration, staff training, and change management would be required?

🔗 Technology fit

- How important are modular applications, open APIs, and the ability to adapt the platform to local needs?
- How should FOLIO fit into the institution's existing technology ecosystem?

🤝 Implementation partnership

- What implementation expertise, technical support, and ongoing resources will the institution need?
- How can institutional teams engage with the global FOLIO community and contribute to its evolution?

Evaluate FOLIO against the outcomes your institution needs to achieve.

Advisory board discussion

What Should We Prioritize for FOLIO in Latin America and the Caribbean?

⚙️ Operational effectiveness	Where can better workflows reduce complexity for library teams?
🔗 Institutional flexibility	What integrations, capabilities, and governance options matter most?
🛡️ Implementation readiness	What would help institutions modernize while protecting service continuity?
🌎 Regional collaboration	Which shared challenges could benefit from coordinated learning and development?
🚀 Future priorities	What should the FOLIO ecosystem focus on next to create the greatest institutional value?
